

ROUND ABOUT

Worksheet - IX

Name: Class: Roll No.:

A. Choose the correct answer.

- 1. A student placed plants in the category of non-living things. He reasoned that plants do not show any movement. Which of the following disproves his claim?**
 - (a) We can move from one place to another, but plants cannot move on their own.
 - (b) The plant in front of your house has stayed there and did not move from its place since your birth.
 - (c) Plants show response to stimuli.
- 2. Johnny tied a dry plastic bag on the leaves of a plant near his house in the evening. When he checked the bag in the morning, he found droplets of water inside the bag. Can you give the reason?**
 - (a) It rained in the night.
 - (b) the water vapour in the atmosphere condensed into water.
 - (c) plants lose water through the pores under their leaves.
- 3. You cannot hear the other person speaking if you are in the space. What reason do you think claims this true?**
 - (a) We have special helmets on our hands that do not let any sound enter in.
 - (b) There's no air in the space to make sound waves travel.
 - (c) Due to high altitude, our ear drums clog in space.
- 4. Tara visited Thar Desert and found that plants there had thick jelly stems and thorns, but no leaves on them. She thinks that hot and dry winds had burnt all leaves. Can you help her get the correct reason?**
 - (a) All leaves are eaten by camels there.
 - (b) The desert plants do not have leaves. Their stems make food for the whole plant.
 - (c) The thorns are actually modified leaves that help plants prevent water loss in such dry conditions.
